Beal Driving Academy cares about the success of our students and our goal is to help to teach our students to be safe and knowledgeable drivers that will help make Maine a safer place for all of us who share the road.

Our students will learn driving from the ground up and no one student will have an advantage over another one. We are here to help you build and grow your confidence behind the wheel. Although your safety is our number one concern, we understand that if our students don’t stay engaged, they will not retain all of the important knowledge we have to impart. So although driving is a serious subject, we are very skilled at creating an exciting and fun class atmosphere.
