Wilson House Dental Practice first opened in Newport Pagnell more than 50 years ago, moving to its present location, a period property in Station Road, in the early 1970s. Since then, it has grown to become the caring, professional, private practice that it is today.

We are proud to provide care for generations of families. The founding dentists at Wilson House believed patient care should be about more than just fixing problems and recognised there was a better way forward.
They shifted their focus to preventative dentistry, providing care, advice, and education to help patients of all ages maintain healthy teeth and gums for a lifetime. The dentists and hygienists who have joined Wilson House since then have embraced this ideology and worked tirelessly to uphold it. Our longevity is the result of our ethos, which is to put our patients first. We combine this mantra with the use of the most modern technologies, priding ourselves on the care and attention our experienced clinicians give our patients. We offer both emergency and non-emergency dental care and a comfortable, child-friendly environment with free on-site parking.
