Company logo

SocialEngine is an award-winning software company founded in 2007. Our flagship product, SocialEngine PHP, provides a white-label CMS platform for creating feature-rich, niche social networks.

SocialEngine PHP is one of the best online community platforms with a wealth of features such as full member control, paid or free membership, messaging, reliable plugins, in-depth security and privacy, and a user-friendly interface. Mobile apps for iOS and Android are also included with each bundle as we know the importance of staying in touch with members.

We are an experienced team that shows passion, innovation, and creativity by providing frequent updates with new features and improvements. We help to bring your vision into reality as you build your own social networking script.
