Dr Arif Aslam is an expert Consultant Dermatologist, fellowship trained, specialising in Mohs surgery; the leading technique for removing facial skin cancers.

A trusted skin specialist
He’s one of a few select specialists working in the UK and Europe to have completed an accredited American College of Mohs Surgery fellowship - the world’s leading membership organisation specialising in Mohs micrographic surgery and reconstruction.
Arif’s been practising medicine since 2004. Born and raised in Lancashire, he completed his training in general medicine and general practice before training in dermatology in Manchester.
