The Group originates and invests in greenfield infrastructure, and then actively manages its investments in projects through their construction phase.

Once operational, the Group either continues to hold and actively manage its interests over the lifetime of the projects (usually up to 30 years) or sells its interests in the projects to secondary market investors (in which case, the Group will typically retain an asset management role).

The Group has committed to 150 investment projects up to December 2019, and has over 48 current projects, thereby establishing itself as a leading name in its core international markets and chosen sectors.
