KORR is an RIBA chartered architectural practice based in Sussex UK. With over 30 years experience, we have developed a diverse portfolio of new-build and refurbishment or extensions projects from small private commissions to commercial projects across the UK and in Brazil. Our projects include conservation and historic buildings.
We work in close collaboration with clients to achieve their aspirations and produce more sustainable, efficient and flexible buildings with simplicity and beauty – architecture that connects to and enhances the day-to-day lives of our clients.
