Ziedot.lv is a charity portal that provides the possibility for individuals and companies to use the Internet to implement their desire to help those in need. Ziedot.lv offers a convenient and secure way to donate to carefully selected and approved charity projects, to follow project development and to be sure that the donation will reach its target. With your donation, you can help children grow, provide brighter days for the elderly, send a surprise to your first school or implement many other types of charity projects. Our goal is to promote positive social changes by providing people the possibility to donate. We believe that people in Latvia are willing to provide support to those who are in the most difficult situations and for those who need only a little help to start a new life.
