The Foundation for Effective Governance (FEG) was established in 2007 to develop and implement projects and programs focused on the long-term development of the Ukrainian economy and to further public debate on the most important economic challenges facing Ukraine. FEG is a nonprofit, independent organization serving the interests of Ukrainian citizens. FEG’s initiatives are focused on practical results; therefore, it actively cooperates with the government at all levels during the development and realization of its projects and programs.
