Stewart Street Dental Practice is a fully fledged dental centre where a wide range of dental services are available onsite.

Dr Vikash Singh established the practice in 1997 with the intention of making it a premier dental facility in the Country. More than a quarter century later, the practice has developed a reputation for delivering quality dental care with the help of technologically advanced equipment onsite and Dr Singh’s years of clinical experience.

At Stewart Street practice, we have over the years established sound rapport and reputation as providers of reliable and internationally acceptable standards of dental care. Our clientele has increased considerably over the years and includes many international agencies, members of the diplomatic corps, NGO’s, and senior government officials. Hence it is essential to make appointments to see Dr Singh.

There are many advanced equipment installed in-house to assist in whatever procedures are necessary to carry out as part of quality dental care. The practice has cone beam CT scanner that assist diagnosis by producing 3D images of dental structures. All normal 2D images are all digital in nature and include OPG’s , lateral cephs and all types of intra oral imaging.
