We have been creating sustainable and lasting change in the lives of children in Fiji for more than 40 years.

As a Child Rights Organisation, we work to ensure children can realise their rights, particularly those children who are in the most vulnerable and marginalised environments.

We work from ground level to policy level and we work directly with children through our child-led initiative Kids Link Fiji and through our Disaster Risk Reduction Child Clubs. We are currently working in 80 communities across 10 Districts in Fiji.

Created in Fiji in 1972, we are a non-political organisation that continues to be dedicated to driving positive change for children in Fiji.
