Fertility Institute of San Diego is a fertility clinic that treats each patient as we would our own family members. The team at our San Diego fertility center thinks you are special, so we treat you as such.

We take great pride in being a boutique practice, where a single physician who knows everything about your case treats you. She is there for every visit and will perform all your ultrasounds and procedures, including egg retrievals and embryo transfers. We combine cutting-edge Western medicine with Eastern alternatives such as acupuncture.
