Essential Skills, located in Washington, DC, and Aurora, ON operates in the US and Canada and is one of the top online learning providers for K-6 Reading, ELL, Math and Science. Essential Skills programs are an ideal supplement for general K-6 classroom instruction, special education, English language learning, older remedial students, and even adult basic education. Our research-based learning software will provide your students with a personalized learning experience, guaranteed to boost confidence and improve outcomes. Every program includes a variety of activities designed for auditory, visual and tactile learners. This helps to ensure standards mastery for all students, regardless of learning style, or ability level.

More than 20,000 schools use our software today because it truly works. We have been helping teachers and students see better results for over 20 years. Our goal is to make a difference in education by providing affordable, technology-based solutions that motivate students, build their confidence, and allow them to achieve success. Whether your students need extra help, or you just want to provide a more personalized learning experience in your classroom, Essential Skills can help.
