Dr. Angus is an experienced, patient-centred, Specialist Orthodontist. He genuinely cares for his adult and child patients and welcomes the opportunity to discuss how he can help you improve your smile.

Dr. Angus provides a wide range of discrete brace treatments such as Invisalign. However, what is most important to Angus is to listen to your needs to allow him to undertake the right treatment for you.

His key principle is to treat you like he would like to be treated. With sensitivity to your needs, communicate effectively and to deliver the results that you have desired.
