Contact our NTPCI tree surgeons for all kinds of tree maintenance requirements in Essex. Established in 1992, Westbury Tree Services has been providing exceptionally high quality and safe tree removal, pruning, crown reduction, stump grinding and hedge trimming services to homeowners, businesses and government bodies. We also offer regular tree maintenance services to make sure your trees remain healthy all year round and pose no threat to you or your property. Neglecting tree maintenance for a long time can make it a breeding ground for pests. In that case, we can remove or prune the problematic areas and let your tree flourish once again. Call now to book an appointment.
