I couldn't have imagined a better first diving experience than with Lisi. She knows how to personalize the diving course as to focus on your necessities and personality. We had very good communication from the beginning. She always makes sure you understand and provides all the information needed for both the diving and the studying part. Lisi made me feel really comfortable during my dives, very calmed down and no rush. Again I really appreciate that she notice who you are as a person and accomstomize the course. Lisi is a fun, happy and very proffesional person and instructor and I can without a doubt reccomend her to every one of you!
