Metal Garden gives you the ability to beautify your garden with affordable metal flower sculptures and garden art, by multi-award winning sculptor, Richard Kloester. Now with Free Delivery Australia Wide. All Metal Garden sculptures are handmade using a handheld plasma cutter which gives a rustic one-off feel as opposed to using mass produced computer laser cutting (CNC). Richard feels that CNC lacks the uniqueness and life he strives to achieve with his handmade pieces. By using a handheld plasma cutter each flower and garden art are different.
