The Dog Business School is an online training company providing Ofqual regulated courses, accredited courses and specialist dog and business related courses. One of our big differences is that our founder, Randle, and our course leader, Kate run licensed dog businesses and dog walking businesses themselves, so we share real life experiences to the supplement the academic parts of the course. We help dog loving folk, explore, design, plan, build and grow dog businesses. We help you to develop and evidence the necessary knowledge, experience and skills, through a blend of courses and resources, all run by real humans under the watchful eye of some demanding canines. We even provide real-time 1-2-1 tutorials to help you achieve your goals.
