M.F.E. Services provides maintenance, testing and servicing for all aspects of fire systems including fire alarms and panels, emergency evacuation training, fire sprinklers, fire pump sets, fire hydrants & hose reels, fire extinguishers, special hazard systems, fire doors and much more. We can also provide installation and general advise on these systems.

Considering fire alarm installation in Brisbane will allow you to be prepared for fire emergencies and ensure safety against fire. Fire alarm systems in Brisbane can alert you, your family, and colleagues from potential and provide enough time to escape. Such fire safety systems can provide you with an early warning signal to something that could be tragic and save your lives.
