Company logo

At Solaris Dental Solutions, we consistently produce high-quality restorations. Our lab utilizes cutting-edge equipment, technology and dental materials.

Back in 2006, we started as Aurum Prosthetics, a dental lab with eight employees. Solaris Dental Solutions is now one of Canada’s top dental labs. As a full-service dental laboratory, we implement industry-leading technology to craft high-quality dental restorations.

We prioritize the quality and efficacy of all of our restorations. Our entire team adheres to key values, including ethical standards and integrity. We strive to provide a service of excellence in our dental lab, which is radiated by our entire dedicated team.
