Verdant Eco SPA is the first ecological beauty salon in Riga where all procedures are performed with certified eco products. In contradistinction to other beauty salons, Verdant Eco Spa only uses natural and eco-certified beauty products of the highest quality providing the best results without harming health or the surrounding environment. The salon offers a full set of beauty services including hairdressing, manicure/pedicure, massages, SPA and a cosmetologist. During the procedures, products made in Latvia will be used as much as possible. Natural beauty care is recommended to everybody, but especially for pregnant women and women with newborns, people with skin problems, people with heightened sensitivity, allergies, asthma and other consequences of an industrial lifestyle.
