The Organic Herb Trading Company has been growing, sourcing, importing and processing organic herbs and spices since 1982. This has afforded us a unique position with which to serve this diverse and dynamic market. From pioneering the production and import of organic herbs in the UK, the company has now matured into the country's leading supplier of organic herbs and herbal ingredients, with a total commitment to balancing organic, sustainable and ethical practices with sound commercial management. Our processing facilities give us the flexibility to meet a diverse range of client's requirements from herbal tea cutting and blending to fine powders for encapsulation.
