We absolutely love weddings. It is a privilege and great honour for us to be part of your very special wedding day as your wedding photographer, giving you memories that will last a lifetime. Depending on the assignment, most of the time we work together as a team and couple to cover your wedding day for the best possible outcome. We also love to travel, meeting interesting people from different countries and making new friends. In the recent months we have already shot weddings in other European countries like Estonia and Finland.
