From gutter cleaning & solar panel cleaning to a full conservatory, our choice of telescopic water fed pole window cleaning equipment is second to none – like our 17 foot telescopic three-section pole – constructed from high quality anodized aluminium – making it light and strong with very little flexing – ideal for glass cleaner & conservatory roofs or hard to reach windows. We're proud to be able to offer complete window washing equipment solutions - making home window cleaning a significantly less frustrating affair. Don't struggle with ladders and makeshift extensions – take a look through our site and you'll see that getting the correct window cleaning kit isn't anywhere near as expensive as you thought. When you consider the costs of paying a window cleaner, or the time it takes to do it yourself with the wrong window cleaning kit – we think you'll be amazed how much easier it is with one of our water fed pole window cleaning systems – and cheaper than you'd think too!
