Pop Quiz computers is an IT managed service provider (MSP)in Philadelphia, Pa. We remotely manage your IT infrastructure and/or end-user systems and take a proactive approach to prevent IT problems before they disrupt normal business operations. We provide a solution for small to medium-sized businesses that lack or have limited in-house IT capabilities, or larger enterprises facing budget pressure and hiring limitations. We offer business services such as email and user support, hardware monitoring, and managed cloud back up. We protect your network with antivirus management and multi-network support and security and software and hardware support on site and off. Additionally we specialize in restaurant POS and offer website design and development.
