Company logo

Company logo

AED US is a medical device manufacturer and distributor of the world's most advanced automated external defibrillators (AEDs) and related products. We offer the full range of AEDs from small pocket-sized personal emergency devices to large, heavy-duty hospital systems that can be programmed to perform lifesaving functions at multiple locations throughout your facility.

The company's mission is to provide life-saving AEDs and related products for individuals and organizations throughout North America. We manufacture our own brand products, but we also provide OEM/ODM services so that you can design your own AED system with your company logo or brand name printed on it.
