Absolute Restoration LLC is a name people trust for quality Indianapolis area restoration of a property when disaster strikes.

When you experience water damage, no matter the source, it is imperative that you begin the dry out process immediately. Within just 24 hours, microorganisms such as mold and fungus begin to grow in damp flooring and walls. Call immediately to begin the drying process. We will arrive on time with our industrial drying equipment and thoroughly dry all surfaces. We will check under flooring and behind walls to ensure that there is no standing water or moisture hiding which can later cause structural damage and mold growth.
