Welcome! We are a team of enthusiastic gamers and developers. In the past 11 years we have created games across genres. We have architected, designed and developed high Traffic Network based games as well as addictive single-player casual games. We build game concepts for clients on turn key model and our team also works on a Work for Hire model with other AAA game teams.
We generally use Unity & JavaScript to build casual games. We even offer teams in Unreal Engine. Most of our JavaScript games use Angular / React / BabylonJS / Phaser. We develop game backends in Java & Node.js. Our concept artists, 3D Modelers, Environment Artist, Texture Artists, Game Developers and AI programmers help you achieve engaging gaming experience for your end users.
Our experience in AR technologies like OpenCV/ANN gives us an edge. Use our design team for lifelike experience for your VR Games.
Our domain expertise and ready made libraries help you launch the game in half the time you would otherwise anticipate.

---> Our Work

50+ iOS Games

80+ Android Games

3 Console Games

20+ Cross-Platform Desktop Games

8+ Years in the Gaming Industry

80+ CGI Artists/Developers

---> Why Us

Expertise :

- AI & Machine Learning (Reinforcement & GAN)
- Game monetization plans
- Game viral factors
- User adrenaline rush for higher engagement
- Game marketing
- Support 24x7
- 100% Code Guarantee

Engagement Model :

- Outsource Game Dev at Fixed Price (Turnkey Basis)
- We sign NDA, Non-Compete and protect client's intellectual property
- Agile development @Fixed Price
- Clients (Product Owners) attend daily standup
- Source Control/Continuous Integration and Deployment
- Access to the whole team during development
- Manual Testing, Load testing and Security testing
- Hire Developers/Designers/Animators on an hourly basis too

Key Clients

Corporate Life : A 3D simulation game (CPD certified) designed around mini projects to improve & increase learners’ hard & soft skills in corporate settings. Players, via 3D Avatars, can interact with each other using Audio & Chat.

MYTHANEX : A multiplayer, strategic, fantasy Collectible Card Game with each card painstakingly developed and balanced via an internal algorithm to ensure players will be tested using their wit, skill & deck-building aptitude rather than relying on luck.
