Fink Kitchens was established in 2009 by Sam Fink. The kitchen design and installation company grew out of Sam and his wife Simone’s love for property investment and management.

Through their work in that field, they became expert in refurbishing properties. From basic redecoration to more extensive bathroom refits and kitchen design and fitting. So, it was a short leap to deciding to set up their own kitchen design company.

Having worked with a range of kitchen companies over the years the Fink team knew they wanted to partner with a quality brand.
