Zenbook Writing is a top online eBook writing company. We offer our ebook marketing services usa in a very precise way. The first step in our process is getting an idea of what it is that you need help with by talking with one of our friendly representatives via phone or email. They will ask questions about what kind of material needs writing, how much time has been spent working on it so far (if any), and whether or not there are any specific requirements for formatting or style guide compliance for submission purposes. Once this information has been gathered up front, we'll provide an estimate based on those factors which should give clients an idea of the cost before they commit themselves further to working with us further down the line!
