The Universal brand was born as a result of increasing market demand for a service that was not only comprehensive but served the buyer, not the seller. In today’s fast paced industry and market competitiveness, making a mistake has increased tenfold, so don’t make one. Working with Universal Buyers Agents takes the pressure, risk, and stress off the purchase so we can focus on uncovering and buying the right property, at the right price, every time. Whether you’re looking for your first property, a development opportunity, commercial or industrial sites, land and house packages, or investments, we can advise, support, manage, or consult on a level that suits or is required.

What sets us apart at Universal Buyers Agents is a policy that each and every agent has a maximum capacity of 5 clients at any given time. This ensures that you and your future are managed and cared for professionally and appropriately with the upmost care and dedication.

Australian owned and operated, Universal is made up of an experienced and passionate team driven to ensure your future is secured financially by investing in blue chip localities. To us, it’s not about the transaction today but rather, the ten into the future.
