Company logo

PET Technologies is a European manufacturer of PET stretch blow molding machines, blow molds and packaging equipment for reasonable price.

The company was founded in 1999.

Export geography includes 60+ countries of the world in Europe, Asia, Africa, North America and Latin America.

PET Technologies specializes in:
• Manufacturing of automatic (3 000-14 000 bph) and universal semi-automatic blow stretch molding equipment for PET bottles production;
• PET bottles design and blow molds production for linear and rotary machines of other worldwide manufacturers;
• prototyping and PET bottle laboratory tests;
• Professional service support, sales and after-sales services.

The company’s plant has a full cycle of production (or vertical production) from metal blanks till ready blower for operation located at 9000 sq m.
