Pest Solutions WA is your trusted pest management partner serving both commercial and residential clients in Perth, Western Australia. Our comprehensive range of pest control services caters to the unique needs of businesses and homes alike.

For commercial establishments, our services encompass termite eradication, insect extermination, rat removal, and more. Meanwhile, our residential pest control solutions cover not only these services but also extend to flea elimination, ant management, spider eradication, mosquito control, and more.

Our pest management strategies employ diverse approaches, including **chemical treatments, biological controls, physical barriers, and heat treatments. Additionally, we provide an array of preventive measures designed to safeguard your home or business, such as sealing gaps and crevices, eliminating potential food sources, and maintaining impeccable sanitation practices.**
