Company logo

Company logo

We are a service provider in the field of international environmental management. Companies that bring products to market in the EU must comply with Extended Producer Responsibility (EPR) in each country, which encompasses over 90 laws in Europe. We not only provide consultancy in this area but also implement all the corresponding obligations per country for our clients. The most common areas are packaging, electrical equipment, and batteries, but depending on the country, we also cover all other existing EPR areas.
