Company logo

Wesbeam is a Western Australian-owned, unlisted public company operating from a $110 million purpose-built manufacturing plant in Neerabup, north of Perth.

Using state-of-the-art equipment from New Zealand, Japan, Finland and Germany, Wesbeam manufactures high-quality Laminated Veneer Lumber (LVL).

Wesbeam LVL is a high-value engineered wood product made from plantation timbers, much of which is sourced around Perth under a 25 year State Agreement between Wesbeam and the Western Australian State Government.
