The Shulman Law Group is based in New Jersey and have represented clients throughout the United States and worldwide, thus earning a national and international reputation as being the best immigration attorneys in business. Our lawyers travel to foreign embassies and consulates to directly handle problematic situations for clients.

If you need a visa, wish to immigrate, or want to help bring a family member or employee to the United States, we can help. Firm founder Edward Shulman has more than 20 years of legal experience, and has also handled many high profile cases during that time. While an understanding of immigration law and procedure is necessary, our immigration attorneys know that consistent communication with our clients is crucial in all matters of immigration law.
