At Dreamlife we will capture the beautiful memories of your special day; every look, every kiss, every little moment, in a way that is a testament to that love. By working closely with you, our specialised wedding photographers will artfully tell your story as a personalised collection of moving and still images that are a culmination of your dream wedding day and a reflection of your personal style.

The Dreamlife Team believes that wedding photography should be the perfect blend of classic and modern; by combining traditional photography techniques with the latest digital technologies, our wedding photography will create a beautiful and timeless visual retelling of the romance and emotions of your wedding day that you can share with friends and family for years to come.

Our professional wedding photographers are highly skilled artists. They will create a relaxed and intimate space where you and your guests will feel at ease and forget about the camera. By using stunning angles and perfectly timed and framed shots, the photographer will unobtrusively photograph all those special moments from preparations, to the ceremony, your first kiss, your first dance, and every candid little moment in between, for as long as you wish.

At Dreamlife we know what beautiful looks like and we are confident that our wedding photography and wedding cinematography will take your breath away. We are a multi-award winning wedding photography and wedding cinematography business whose accolades are backed by testimonies from our customers: real brides who entrusted us with capturing their perfect wedding day. Don’t just take our word for it though…scroll through some of the weddings we’ve photographed. We believe our images speak for themselves.
