Aerobotics Global is a robotics education and learning centre in Melbourne which provides advanced robotics and programming courses in Melbourne. We also offer online robotics and coding programs for kids. With an aim to lead the way in coding for robotics education, we deliver the highest quality learning experience to our clients.
We offer a wide range of robotics courses and education programs, including summer courses, workshops, after school programs, holiday programs in Melbourne, programming and coding courses and more to students and teachers. Our coding and robotics courses are best suited or kids of all ages. We have a team of certified, knowledgeable and passionate trainers who leave no stone unturned in ensuring students receive hands-on, holistic learning experience. Our learning materials are aligned to Victorian Curriculum and activities based on STEM concepts, including the approach to practice real coding for robotics and maintain superior educational standards and prepare future world leaders!
