Kelly Webmasters & Marketers was founded by husband and wife team Brandon and Mengdie Kelly. Since our inception, we have focused on driving measurable, data-driven SEO results for our clients. It doesn’t matter whether you’re a local mom-and-pop shop from down the street in Naples, Florida, or a nationwide business with offices from coast to coast – when you collaborate with Kelly WM, you are guaranteed outstanding service and first page Google results. Our first client was a volunteer project for an Alzheimer’s care provider – we had so much fun customizing and ranking the site that we began doing free web development work for small businesses throughout Naples. Within a few years, we had expanded from a few local clients to dozens, building up a portfolio that extended far beyond our local community. It was time to turn our passion project into a business. Since transitioning to a for-profit model, we have been able to commit more time to each project, and the results of this speak for themselves. One of our first paying clients, a small boat tour company improved their Google performance and grew from 1 boat on Marco Island to 7 boats with 3 locations within 2 years of working with our team, which has now grown from 2 to 23 employees.
