Here at Partida Corona Medical Center in Las Vegas,Nevada, we believe greatness can come from the most humble beginnings. Started in 2005 with my wife as front desk and my newborn as the greeter in an 800 square foot office, our center now encompasses 8,000 square feet, 5 office staff, 2 nurse practitioners and one physician. We offer an extensive list of services that I dare say set us apart from the rest. It is not the diversity of services we offer, however how we approach our patients that truly define us. Offering state of the art healthcare equipment and working with experienced professionals; Partida Corona Medical Center is the catalyst of evolving health services. All medical services are provided proficiently in English & Spanish. We take our time to explain to our patients their particular diagnosis and treatment plan. We accept walk in appointments for our established patients to address acute medical conditions in a more timely fashion, many times avoiding a trip to the hospital.
