Rydot Infotech is your companion in understanding the future of digital transformation. It brings innovation with scalability to empower businesses, spread across services such as Big Data, Artificial Intelligence, Business Intelligence, GIS, and Geo AI solutions. From an upgraded high-tech product like the Solar Monitoring System to an advanced AI-driven computer vision platform named Recognizer, we are focused on solving modern challenges with precision.

We do more than just provide technology; we are the thinkers who care about your success. Our service skills include Blockchain and DevOps, Mobile Applications, Web Development, and Robotic Process Automation. Finally, we use Amazon Web Services or Microsoft Azure Cloud with IoT and Automation solutions and make sure our services are specially crafted to meet specific business needs.

Included are Turnout-a face recognition-based attendance and access control system and the Digital Attendant interactive navigation platform that further enhances the process.

We love creating your digital path with custom solutions yielding real results at Rydot Infotech. Team up, and let us take your business forward in this innovative, efficient, and digitally enhanced way.
