Company logo

In order to serve the pharmaceutical and biotechnology, automotive and filtering, semiconductor and electronics, defense, space and aeronautics, and other high-tech manufacturing industries, as well as environmental monitoring and scientific and industrial research, MTPL was established in October 2007 with the goal of distributing and supporting scientific and industrial instruments from globally renowned companies.

Particle measurement, clean room monitoring, steam, compressed air, and nitrogen gas testing, filter testing, and environmental and indoor air quality measurement equipment are among the specialties that MTPL established.
