We are an Australian-owned and operated solar retailer with over a decade of experience in solar power installation in Melbourne. We are experts in installing top-quality residential and commercial solar systems at competitive prices, while providing exceptional customer service. We specialise in working with various property types, including apartments, high-rise buildings, slate tiles, terracotta tiles, and steep pitches, ensuring the highest level of workmanship. We assist in transitioning away from gas, whether through hydronic heating conversion to electric, heat pump hot water systems, or EV charging solutions, helping you lead a more renewable life.
