Company logo

OBS Facilities, a leading building and architectural design company in London, offers bespoke services. Our company has been providing customised solutions to our clients for over three decades.

Our team is made up of highly-skilled architects, designers, project managers and estimators. We also have skilled builders.

We offer our plumbing services in West London, Ealing and Hanwell as well as Harrow, Kingston, Wembley and Middlesex.

Plumbing services we provide are mostly related to central heating, boiler systems and home improvements. OBS Facilities specializes in professional kitchen fitters in London, delivering high-quality installations tailored to client needs.

We strive to provide plumbing services of the highest quality, at the best possible price and without cutting corners. We see illegal work done by other companies which puts the lives of people at risk. These are usually families like ours. We are fully licensed to work in customers' homes, and we are committed to exposing illegal gas workers.
