CMQ Engineering is a leading mining equipment supplier that provides innovative world class products dedicated to helping you attain superior results. We've built our good standing by offering amazing service, using state of the art technology and leveraging our nearly 60 years of experience to help clients succeed.

We offer comprehensive engineering design services fulfilled by an expert team inside the company which means your project will be handled efficiently and meet all Australian standards. Having worked on sites around the world means we have the experience and skills to effectively & safely install a variety of equipment on site regardless of its location. Our experience overseas also means we can offer you helpful insights and management of any turnkey greenfield projects.

As leading mineral processing equipment manufacturers, CMQ Engineering can meet your manufacturing requirements and excel at making high quality equipment that meets the demands of today. Our rigorous quality assurance procedures ensure that your expectations and demands will be met. We offer a variety of products that include:

- Concrete Plants – State of the art batching plants, mixers, hoppers and more.
- Mining Engineering Equipment – Includes machinery such as conveyors, storage silos, static blending plants in addition to other top quality equipment.
- Mobiles – Top of class durability and flexibility of deployment make our line of mobile machinery a must have on any site.
- Concrete Reclaiming Equipment – Get the latest in highly efficient recycling products to help minimise waste.
- Quarry Equipment – We can provide you with machinery that can help maximise your quarry work with the latest in belt weighers, air classifiers and other important hardware.

Our experience, commitment to excellence and meticulous design process means you will be getting products to help keep you in front of the competition. Contact the mining equipment suppliers at CMQ Engineering today to get started.
