Company logo

Company logo

With 40 years of experience serving Queensland, Cooler is the trusted refrigerated vehicles fabricator. We have earned our reputation by manufacturing durable refrigerated trucks for various industries including wholesale food companies, a sector of the Queensland’s government, and an international logistic chain. Proudly Australian-owned, we design vehicles to withstand the harsh Aussie climate and deliver lasting performance. Rest assured that your products are kept fresh and secure while in transport with our fleet of trucks from Cooler.

We offer a range of refrigerated truck services including vehicle refrigeration installation, custom builds for truck refrigeration, ute refrigeration units, refrigerated pantechs, and van refrigeration systems.

As with every vehicle, we understand the wear and tear of refrigerated trucks and that is why, here at Cooler we have certified truck refrigeration mechanics for all truck refrigeration repairs and maintenance requirements, ensuring your fleet stays in top working condition.

If your organisation needs reliable and durable transport refrigeration equipment, give us a call, send an email to info@cooler.au, or get in touch through our contact page.
