Company logo

Founded in 1988, Kelly Valve Co., Ltd. is a leading manufacturer of Flow Control Valves and Industrial Valves, with manufacturing facilities located in Xiamen and Zhejiang. Our dedication to excellence is reflected in our advanced R&D capabilities, cutting-edge factories, and adherence to industry certifications such as ISO 9001, API 6D, and PED CE, ensuring the highest quality products for industries around the world.

Beyond our standard valve offerings, Kelly Valve specializes in custom-designed solutions tailored to meet the specific needs of our clients. Our experienced procurement and sales teams collaborate with over 100 trusted manufacturers, ensuring seamless sourcing, rigorous quality control, and on-time delivery. We provide exceptional customer service throughout the entire process, from pre-sales inquiries to after-sales support, ensuring a smooth and satisfying experience for all.

With a global presence spanning more than 20 countries and serving industry giants like BP, SHELL, and PETRONAS, Kelly's valves are trusted worldwide. We remain committed to delivering high-quality, reliable, and competitively priced products, adding value to our clients across key industries including oil and gas, power generation, and petrochemical.Know more about Google SEO Directory
