Company logo

CMQ Engineering is one of the leading **mining equipment manufacturers** in the world that provides innovative design, world class products and installation dedicated to helping you attain superior results. We've built our good standing by offering amazing service, using state of the art technology and leveraging & our nearly 60 years of experience to help clients succeed.

We offer comprehensive engineering design services fulfilled by an expert team inside the company which means your project will be handled efficiently and meet your standards. Having worked on sites around the world means we have the experience and skills to safely & efficiently install a variety of equipment on site regardless of its location. Our experience with operations abroad means we can offer you helpful insights and management of any turnkey greenfield projects.

As leading **mining and quarrying machinery and equipment manufacturers**, CMQ Engineering can meet your manufacturing requirements and excel at making high quality equipment that meets the demands of today. Our rigorous quality assurance procedures ensure that your expectations and demands will be met. We offer a variety of products that include:

- **Concrete Plant Manufacturers** – State of the art batching plants, mixers, hoppers and more.
- **Industrial Mining Equipment** – Includes machinery such as conveyors, storage silos, static blending plants in addition to other top quality equipment.
- **Mobile Concrete Equipment**– Top of class durability and flexibility of deployment make our line of mobile machinery a must have on any site.
- **Concrete Recycling Equipment** – Get the latest in highly efficient recycling products to help minimise waste.

- **Quarry Mining Equipment** – We can provide you with machinery that can help maximise your quarry work with the latest in belt weighers, air classifiers and other important hardware.

Our experience, commitment to excellence and meticulous design process means you will be getting products to help keep you in front of the competition. For high quality products manufactured by an expert **mining engineering company**, contact CMQ Engineering today to get started.
