At Whooshh Innovations, we are a pioneering technology company focused on creating solutions that improve fish passage and promote ecosystem health. Our flagship product, the Whooshh Fish Transport System, employs innovative engineering to facilitate the safe and efficient movement of fish across barriers. Committed to sustainability, we partner with organizations to enhance aquatic habitats while actively supporting conservation initiatives. With our groundbreaking technology, Whooshh Innovations is dedicated to making a positive difference in preserving and protecting our natural waterways and aquatic life.
