CAVIUS has been available in New Zealand since it first launched globally in 2011, with our Nano Range of 10-year battery operated photoelectric smoke alarms.

CAVIUS is distributed in New Zealand by On Point Distribution Partners Ltd a wholly owned New Zealand company that has been involved with CAVIUS Denmark, and the development of the CAVIUS range, since 2004.

We now offer a range of smoke, thermal and CO alarms that are available from over 700 retailers and electrical wholesalers in New Zealand.
