Citi Design is a Brisbane-based Australian firm with over 20 years of experience in hydraulic plumbing design and wastewater management. Specializing in commercial and industrial sectors, they offer comprehensive services including water supply systems, stormwater drainage, trade waste solutions, and hot water system designs. Their team combines professional CAD drawings with practical on-site construction expertise to ensure efficient, compliant, and sustainable outcomes for projects across Australia. Citi Design is recognized for its commitment to regulatory compliance, cost-effective solutions, and environmental sustainability in hydraulic engineering.
